Vanshika Singh Chauhan

+91-9460865712 | chauhanvanshika277@gmail.com | linkedin | github | codolio | portfolio | Jaipur, India

Technical Skills

Languages: Java, C, SQL
Backend: Spring Boot, REST APIs, JPA
Frontend: HTML, CSS
Tools: Git, GitHub, Postman
Core CS: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks
Programming: Problem Solving, Competitive Programming

Achievements

- Solved **550+** DSA problems across platforms, including 300+ on GeeksforGeeks
- Achieved a **LeetCode** contest rating of **1600** (Max: 1635) – profile
- Participated in 20+ coding contests across LeetCode, CodeChef, and Codeforces
- Qualified the first round of Smart India Hackathon (SIH 2025)

Projects

Security Management System Java, Spring Boot, Spring Security, JPA, Angular

- Architected a modular Spring Boot MVC system to replace a legacy EJB-based application, restructuring the codebase into reusable, maintainable service layers
- Designed a role-based access control model with Spring Security and JWT, defining permission boundaries across multiple user roles
- Modeled the JPA persistence layer and entity relationships to support efficient, scalable database operations
- Defined the REST API contract consumed by the Angular frontend, structuring endpoints for clean separation between client and server

Smart Email Assist Java, Spring Boot, Spring AI

- Built an AI-powered email assistant to automate email drafting and response generation using Spring AI
- Developed REST APIs to handle prompt processing, response generation, and backend orchestration
- Designed a scalable backend service architecture for efficient content generation workflows
- Improved user productivity by reducing manual email writing effort through intelligent automation

Experience

Web Developer Intern September 2026 – Present Thinkyantra Solution Pvt. Ltd. — Jaipur,India

- Developing responsive web interfaces using React for client and company projects
- Contributing to frontend and backend integration using REST APIs and application workflows
- Working with databases to support application data management and backend functionality
- Collaborating on client projects and implementing responsive UI features based on project requirements

Generative AI Intern May 2026 – July 2026 MNIT Jaipur — Jaipur,India

- Developed Generative AI workflows using prompt engineering and Large Language Models (LLMs) for workflow automation
- Built AI pipelines for document and text processing, including summarization, information extraction, and structured output generation
- Designed workflows to transform unstructured documents and instructions into structured, actionable outputs
- Experimented with prompt design and LLM-based approaches to improve the accuracy and consistency of generated outputs

Java Spring Boot Intern June 2025 – July 2025 Client Project – Security Management System — Jaipur,India

- Migrated 10+ legacy EJB modules to the new architecture as part of a phased rollout, cutting code duplication and easing future maintenance
- Integrated the Angular frontend with 15+ backend REST endpoints, resolving data-sync issues surfaced during client testing
- Rolled out role-based authentication workflows across the client's team, reducing unauthorized access incidents during testing
- Collaborated directly with the client team to validate features against production requirements before release

Education

B.Tech – Information Technology 2023 – 2027
Swami Keshvanand Institute of Technology, Jaipur CGPA: 9.00/10

Higher Secondary Education 2022 – 2023
Gyaan Jyotii Vidyapeeth SSS 89%

Secondary Education (Class X) 2020 – 2021
Gyaan Jyotii Vidyapeeth SSS 97%

Certifications

- AWS Academy Cloud Foundations – AWS Academy
- Linux Fundamentals (RH104) – Red Hat Academy
- Java Programming – Oracle Academy
- DevOps Workshop – IEEE Upflairs
